**D/A Converter for Digital Tuning  
(Compatible with I<sup>2</sup>C Bus)****MB88141A****■ DESCRIPTION**

The FUJITSU MB88141A is an 8-bit D/A converter with 12 built-in channels.

The 12 analog output channels have built-in OP Amps, providing large current drive capability.

Data input is compatible with I<sup>2</sup>C specifications, and is controlled by two control lines.

The built-in I/O expander function allows the MB88141A to be controlled by devices incompatible with I<sup>2</sup>C bus specifications (provides conversion between I<sup>2</sup>C serial and 8- or 4-bit parallel I/O).

The MB88141A is ideal for replacing electronic knob or pre-set variable resistance tuning devices.

## 2. For D/A Converter + I/O Expander Operation (MOD = "H")

### (1) I<sup>2</sup>C Bus Format

[ ] : Sent from master device [ ] : Sent from MB88141A (slave device)

S : "Start" condition

P : "Stop" condition

A : "Acknowledge" output

### (2) Slave Address Comparison (7 bits)

Slave address comparison is the same as for D/A converter (12-channel) operation (see "1. (2) "Slave Address Comparison"), with the exception that the CS2 setting determines the number of D/A converter channels and the number of I/O expander bits.

CS2	D/A converter	I/O expander
0	4 channels (AO1 to AO4)	8 bits (D7 to D0)
1	8 channels (AO1 to AO8)	4 bits (D3 to D0)

When CS2 = "1" is selected, the upper 4 bits (D7 to D4) of write operations (I<sup>2</sup>C bus to parallel interface) are ignored, and the upper 4 bits of read operations (parallel interface to I<sup>2</sup>C bus) are output at "0" (low).

### (3) R/W Selection (1 bit)

R/W	I/O expander operation	D/A converter operation
0	I <sup>2</sup> C bus input → parallel data output	I <sup>2</sup> C bus input → analog output
1	Parallel data input → I <sup>2</sup> C bus output	—

#### (4) Channel Selection (8 bits)

× : Don't Care

#### (5) D/A Data (8 bits)

Same as “1 (5) D/A Data (8 bits)”.

#### (6) I/O Expander Continuous Operation

I<sup>2</sup>C bus input → parallel data output

S	Slave address	0	A	X X X X 1 1 1 1	A	Digital data	A	...	Digital data	A	P
