Description

Third Generation HEXFETs from International Rectifier provide the designer with the best combination of fast switching, ruggedized device design, low on-resistance and cost-effectiveness.

The TO-247 Fullpak eliminates the need for additional insulating hardware in commercial-industrial applications. The package has been carefully designed to meet the creepage distance requirements of UL 1012. For further information request application note AN972, "Thermal and Mechanical Considerations for FullPak Applications".
