STPC CONSUMER-S OVERVIEW

The STPC Consumer-S integrates a standard 5th generation x86 core, a Synchronous DRAM controller, a graphics subsystem, a video input port, video pipeline, and support logic including PCI, ISA, and IDE controllers to provide a single consumer orientated PC compatible subsystem on a single device.
The device is based on a tightly coupled Unified Memory Architecture (UMA), sharing the same memory array between the CPU main memory and the graphics and video frame buffers.

The STPC Consumer-S is packaged in a 388 Plastic Ball Grid Array (PBGA).
