

GaAs SPDT SWITCH IC

■ GENERAL DESCRIPTION

NJG1508F is a GaAs SPDT switch IC featuring a low loss, a high isolation and a low control current.

In the wide frequency range from 100MHz to 3GHz, The this IC operates at a low voltage from 2.5V.

A very small package is adopted.

It is suited from the switch in receiving circuit of RF frequency of PDC.

■ PACKAGE OUTLINE

NJG1508F

■ FEATURES

- Single and low control voltage +2.5~+5.5 V
- Low insertion loss 0.3dB Typ.@ f =1GHz、 P_{in} =0dBm
- High isolation 27dB Typ.@ f =1GHz、 P_{in} =0dBm
- Passing power 19dBm MAX.@ f =2GHz、 V_{CTR} =3.0V
- Low control current 1 μ A Typ.@ f =0.1~2.5GHz、 P_{in} =10dBm
- Small package MTP6

■ APPLICATION CIRCUIT 1: Single signal control circuit using C-MOS inverter

- [1] Please connect the bypass capacitor to C-MOS inverter supply terminal.
- [2] In order to the state of input impedance of inverter, Please pull-down with 510k Ω of resister for C-MOS inverter input terminal.

■ APPLICATION CIRCUIT 2: Single signal control circuit using transistor.

Usage precaution on devices

- [1] Outer capacitors should be connected to the input and output RF frequency terminal (P1,P2,PC)to block the DC current. The above figure is a circuit's example to a frequency at 900MHz. Please use a capacitor from 10pF to 1000pF to be suited for using band.
- [2] Decoupling capacitors should be connected to the control terminals(V_{CTR1} , V_{CTR2}) as near as possible. The values of these capacitors should be selected from 5pF to 100pF for using band. But take care of the switching time because the capacitor make the switching time late.
- [3] In order to keep good isolation characteristics, the ground terminal (2pin)should be connected to ground pattern with relatively wide width as near as possible, and Though-hole in the ground plane should be placed as near as possible too.

Caution on using the products

A GaAs is used in this products. A GaAs is a harmful material.

- Don't eat or in the mouth.
- Don't dispose in fire or break up the products.
- Don't be make a gas or a powdered with the chemical reaction.
- In the case of wasting the products, please obey the relation rule in the each country.
- This products may be broken with static electric discharge or serge voltage. Therefore, please note a handling.
