# MOS FIELD EFFECT POWER TRANSISTORS

## 2SJ325, 2SJ325-Z

### SWITCHING

### P-CHANNEL POWER MOS FET

### INDUSTRIAL USE

#### DESCRIPTION

The 2SJ325 is P-channel MOS Field Effect Transistor designed for solenoid, motor and lamp driver.

#### FEATURES

- Low On-state Resistance  
 $R_{DS(on)} = 83 \text{ m}\Omega \text{ TYP. (} V_{GS} = -10 \text{ V, } I_D = -2 \text{ A)}$   
 $R_{DS(on)} = 0.15 \Omega \text{ TYP. (} V_{GS} = -4 \text{ V, } I_D = -1.6 \text{ A)}$
- Low  $C_{iss}$   $C_{iss} = 800 \text{ pF TYP.}$
- Built-in G-S Gate Protection Diode

#### QUALITY GRADE

Standard

Please refer to "Quality grade on NEC Semiconductor Devices" (Document number IEI-1209) published by NEC Corporation to know the specification of quality grade on the devices and its recommended applications.

#### ABSOLUTE MAXIMUM RATINGS ( $T_a = 25^\circ\text{C}$ )

|                                                      |                       |             |                  |
|------------------------------------------------------|-----------------------|-------------|------------------|
| Drain to Source Voltage                              | $V_{DSS}$             | -30         | V                |
| Gate to Source Voltage (AC)                          | $V_{GSS}$             | $\pm 20$    | V                |
| Gate to Source Voltage (DC)                          | $V_{GSS}$             | -20, +10    | V                |
| Drain Current (DC)                                   | $I_D(\text{DC})$      | $\pm 4.0$   | A                |
| Drain Current (pulse)                                | $I_D(\text{pulse})^*$ | $\pm 16$    | A                |
| Total Power Dissipation ( $T_c = 25^\circ\text{C}$ ) | $P_{T1}$              | 20          | W                |
| Total Power Dissipation ( $T_a = 25^\circ\text{C}$ ) | $P_{T2}$              | 1.0         | W                |
| Channel Temperature                                  | $T_{ch}$              | 150         | $^\circ\text{C}$ |
| Storage Temperature                                  | $T_{stg}$             | -55 to +150 | $^\circ\text{C}$ |

\*  $PW \leq 10 \mu\text{s}$ , Duty Cycle  $\leq 1\%$

NEC Corporation does not assume any liability for infringement of patents, copyrights or other intellectual property rights of third parties by or arising from use of a device described herein or any other liability arising from use of such device. No license, either express, implied or otherwise, is granted under any patents, copyrights or other intellectual property rights of NEC Corporation or others.

The devices listed in this document are not suitable for use in aerospace equipment, submarine cables, nuclear reactor control systems and life support systems. If customers intend to use NEC devices for above applications or they intend to use "Standard" quality grade NEC devices for applications not intended by NEC, please contact our sales people in advance.

Application examples recommended by NEC Corporation.

Standard: Computer, Office equipment, Communication equipment, Test and Measurement equipment, Machine tools, Industrial robots, Audio and Visual equipment, Other consumer products, etc.

Special: Automotive and Transportation equipment, Traffic control systems, Antidisaster systems, Anticrime systems, etc.
