

N-Channel Enhancement-Mode Vertical DMOS FET

Features

- ▶ Low threshold — 2.0V max
- ▶ High input impedance
- ▶ Low input capacitance — 125pF max
- ▶ Fast switching speeds
- ▶ Low ON-resistance
- ▶ Free from secondary breakdown
- ▶ Low input and output leakage
- ▶ Complementary N and P-channel devices

Applications

- ▶ Logic level interfaces — ideal for TTL and CMOS
- ▶ Solid state relays
- ▶ Battery operated systems
- ▶ Photo voltaic devices
- ▶ Analog switches
- ▶ General purpose line drivers
- ▶ Telecom switches

Ordering Information

BV_{DSS}/BV_{DGS} (V)	$R_{DS(ON)}$ max (Ω)	$V_{GS(th)}$ max (V)	$I_{D(ON)}$ min (A)	Package Options	
				TO-243AA (SOT-89)	Die*
240	6.0	2.0	1.0	TN2524N8-G	TN2524ND

-G indicates package is RoHS compliant ('Green')

* MIL visual screening available.

Absolute Maximum Ratings

Parameter	Value
Drain-to-source voltage	BV_{DSS}
Drain-to-gate voltage	BV_{DGS}
Gate-to-source voltage	$\pm 20V$
Operating and storage temperature	-55°C to +150°C
Soldering temperature*	300°C

Absolute Maximum Ratings are those values beyond which damage to the device may occur. Functional operation under these conditions is not implied. Continuous operation of the device at the absolute rating level may affect device reliability. All voltages are referenced to device ground.

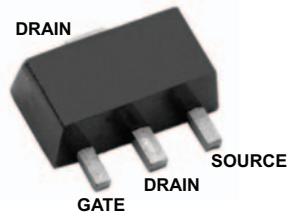

* Distance of 1.6mm from case for 10 seconds.

General Description

This low threshold, enhancement-mode (normally-off) transistor utilizes a vertical DMOS structure and Supertex's well-proven, silicon-gate manufacturing process. This combination produces a device with the power handling capabilities of bipolar transistors and the high input impedance and positive temperature coefficient inherent in MOS devices. Characteristic of all MOS structures, this device is free from thermal runaway and thermally-induced secondary breakdown.

Supertex's vertical DMOS FETs are ideally suited to a wide range of switching and amplifying applications where very low threshold voltage, high breakdown voltage, high input impedance, low input capacitance, and fast switching speeds are desired.
