FireSense
FIRE ALARM EQUIPMENT

Features:

- Fully programmable control from 2800 panel

- 8 x 3 position switches
- 8 Green LED's (Run)
- 8 Red LED's (Stop)
- 8 Amber LED's (Fault)
- Fire Trip Reset Button
- Fire Trip Activated LED
- Lamp Test

Ideal For:

- AS1668 Fan Controls
- Damper Controls

Description:

The 2800-SCS-8 Annunciator Module connects to the AFP-2800 RS485 communication ring and can be mounted internally of externally from the panel.

Each LED is individually controlled and each switch position is individually read via the AFP-2800 system software

A Fire Trip Reset button is provided to comply with AS1668.1:1998 which provides independent re-setting of the smoke control system including motorized dampers.

Slide in paper labels make custom labelling simple and neat.

Up to 99 annunciators can be installed per communications ring.

Specifications:

Operating Voltage   18-27VDC
Current Consumption: 100mA Max
Communications: RS485
Addresses: 1-99
