

# SLA7611M

 Star Connection/Delta Connection

## ■Absolute Maximum Ratings

(Ta=25°C)

| Parameter                     | Symbol                | Ratings                      | Unit | Remarks          |
|-------------------------------|-----------------------|------------------------------|------|------------------|
| Main Supply Voltage           | V <sub>BB</sub>       | 36                           | V    |                  |
| Logic Supply Voltage          | V <sub>CC</sub>       | 7                            | V    |                  |
| Output Current                | I <sub>O (AvE)</sub>  | 3                            | A    |                  |
|                               | I <sub>O (Peak)</sub> | 6                            | A    | tw < 1ms         |
| Logic Input Voltage           | V <sub>IN</sub>       | -0.3 to V <sub>CC</sub> +0.3 | V    |                  |
| REF Input Voltage             | V <sub>REF</sub>      | -0.3 to V <sub>CC</sub> +0.3 | V    |                  |
| PFD Input Voltage             | V <sub>PFD</sub>      | -0.3 to V <sub>CC</sub> +0.3 | V    |                  |
| Sense Voltage                 | V <sub>Rs</sub>       | -2 to 2                      | V    |                  |
| Power Dissipation             | P <sub>D</sub>        | 4                            | W    | Without heatsink |
| Junction Temperature          | T <sub>j</sub>        | 150                          | °C   |                  |
| Operating Ambient Temperature | T <sub>a</sub>        | -20 to 85                    | °C   |                  |
| Storage Temperature           | T <sub>stg</sub>      | -30 to 150                   | °C   |                  |

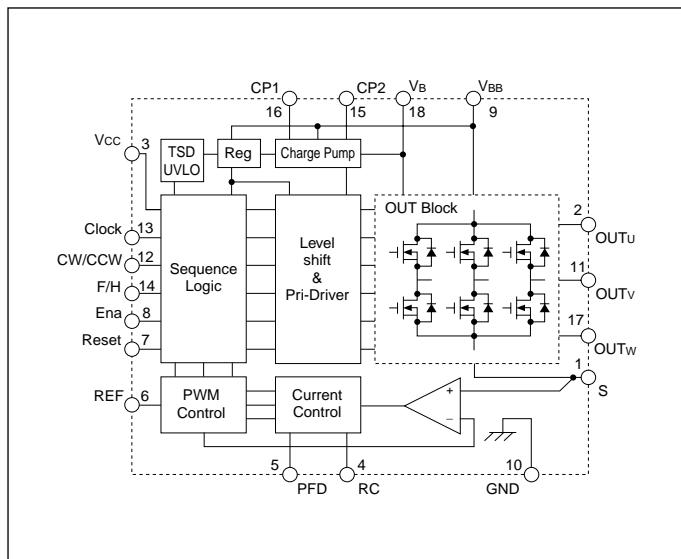

## ■Recommended Operating Conditions

| Parameter            | Symbol           | Ratings                | Unit | Remarks   |
|----------------------|------------------|------------------------|------|---|
| Main Supply Voltage  | V <sub>BB</sub>  | 10 to 30               | V    |   |
| Logic Supply Voltage | V <sub>CC</sub>  | 3 to 5.5               | V    | The V <sub>CC</sub> surge voltage should be 0.5V or lower.  |
| REF Input Voltage    | V <sub>REF</sub> | 0.2 to V <sub>CC</sub> | V    | The control current precision is degraded at 0.2V or lower. |
| Case Temperature     | T <sub>C</sub>   | 110max                 | °C   | Temperature at Pin-10 Lead (without heatsink)               |

## ■Electrical Characteristics (T<sub>a</sub> = 25°C, V<sub>BB</sub> = 24V, V<sub>CC</sub> = 5V, unless otherwise specified)

| Parameter   | Symbol               | Ratings               |                                    |                       | Unit | Remarks                   |
|---|----------------------|-----------------------|------------------------------------|-----------------------|------|---------------------------|
|   |                      | min                   | typ                                | max                   |      |                           |
| Main Supply Current   | I <sub>BB</sub>      |                       |                                    | 20                    | mA   |                           |
| Logic Supply Current  | I <sub>CC</sub>      |                       |                                    | 10                    | mA   |                           |
| Charge Pump Voltage   | V <sub>B</sub>       | V <sub>BB</sub> +5    |                                    |                       | V    |                           |
| Output Withstand Voltage  | V <sub>O</sub>       | 36                    |                                    |                       | V    |                           |
| Output MOS FET ON Resistance<br>(total of the upper and lower values) | R <sub>DS (on)</sub> |                       |                                    | 0.8                   | Ω    | I <sub>DS</sub> =3A       |
| Output MOS FET<br>Diode Forward Voltage                               | V <sub>SD</sub>      |                       |                                    | 1.5                   | V    | I <sub>SD</sub> =3A       |

### ■Internal Block Diagram

### ■Pin Assignment (Function Table)

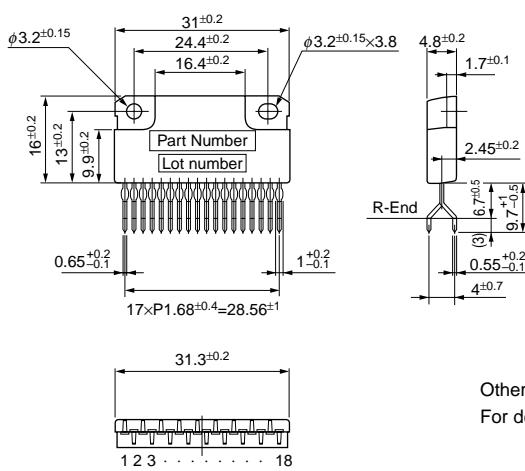

| Pin No. | Symbol          | Function                      |
|---------|-----------------|-------------------------------|
| 1       | Sense           | Current sense                 |
| 2       | Out U           | Phase U output                |
| 3       | V <sub>cc</sub> | Logic supply                  |
| 4       | RC              | PWM OFF time setting          |
| 5       | PFD             | Mixed Decay ratio setting     |
| 6       | REF             | Control current setting       |
| 7       | Reset           | Internal logic reset          |
| 8       | Ena             | Output Enable/Disable control |
| 9       | V <sub>bb</sub> | Main supply (motor supply)    |
| 10      | GND             | Device GND                    |
| 11      | Out V           | Phase V output                |
| 12      | CW/CCW          | Forward/reverse control       |
| 13      | Clock           | Step Clock                    |
| 14      | Full/Half       | Full/half step control        |
| 15      | CP2             | Charge pump capacitor 2       |
| 16      | CP1             | Charge pump capacitor 1       |
| 17      | Out W           | Phase W output                |
| 18      | V <sub>b</sub>  | Boost charge pump             |
