

# INDUSTRIAL ETHERNET GIGABIT FIBER TRANSCEIVERS

## PRODUCT HIGHLIGHTS

- SFP 1.25 Gbps fiber transceivers with LC style connectors
- Pluggable for quick and easy installation - saves you time
- Industry standard Small Form Factor (MSA compliant) - saves you space
- Multimode and singlemode models available
- Noise immune fiber runs from 550 m to 80 km
- Industrial rated for -40 to 85°C operation
- Vibration resistance latching mechanism
- Small Form Factor Pluggable MSA compliant
- Fully compliant with IEEE 802.3z Gigabit Ethernet standards
- Low power consumption
- Standard duplex LC receptacle
- Laser Class 1 product - IEC60825-1 compliant

Lead and Hazardous  
Substance Free

## RECOMMENDED OPERATING CONDITIONS

PARAMETER	MIN.	TYP.	MAX	UNIT	NOTE
Operating Temperature	-40	-	85	°C	-
Storage Temperature	-40	-	85	°C	-
Humidity	5	-	95	%	non-condensing
Power Supply Voltage	3.1	3.3	3.5	V	-
Supply Current (3.3V)	-	-	85	mA	-
Data Rate	-	1250	-	Mbit/s	-

Note: Use this special singlemode transceiver with multimode fiber cable for a nominal maximum link distance of 2 km. This transceiver offsets the transmitted light (so no mode conditioning patch cord is required) and is specifically for use with multimode fiber cable. It is recommended that this transceiver be used on both ends of the cable for best performance. Do not use this transceiver with singlemode fiber cable.

Note 1: The distance rating is for reference only. For accurate distance estimations, the power budget should be used.

Note 2: The 2 km transmission distance corresponds to using the special GMFIBER-SFP-2K transceiver with multimode fiber cable. This transceiver offsets the transmitted light (so no mode conditioning patch cord is required) and is specifically for use with multimode fiber cable. It is recommended that this transceiver be used on both ends of the cable for best performance. Do not use this transceiver with singlemode fiber cable.
