

## Low noise low drop voltage regulator with shutdown function

### Features

- Output current up to 150 mA
- Low dropout voltage (350 mV at  $I_{OUT} = 50$  mA)
- Very low quiescent current: 0.1  $\mu$ A in OFF mode and max. 250  $\mu$ A in ON mode at  $I_{OUT} = 0$  mA
- Low output noise: typ 30  $\mu$ V at  $I_{OUT} = 60$  mA and 10 Hz < f < 80 kHz
- Wide range of output voltages
- Internal current and thermal limit
- Operative input voltage from:  
 $V_{OUT} + 0.5$  to 14 V (for  $V_{OUT} > 2$  V)  
 or from 2.5 V to 14 V (for  $V_{OUT} < 2$  V)

### Description

The LK112xx is a low dropout linear regulator with a built in electronic switch. The internal switch can be controlled by TTL or CMOS logic levels. The device is ON state when the control pin is pulled to a logic high level. An external capacitor can be used connected to the noise bypass pin to lower the output noise level to 30  $\mu$ Vrms. An internal PNP pass transistor is used to achieve a low dropout voltage.

The LK112xx has a very low quiescent current in ON MODE while in OFF MODE the  $I_q$  is reduced down to 100 nA max. The internal thermal shutdown circuitry limits the junction temperature to below 150 °C. The load current is internally monitored and the device will shutdown in the presence of a short circuit or overcurrent condition at the output.

## 6 Package mechanical data

In order to meet environmental requirements, ST offers these devices in ECOPACK<sup>®</sup> packages. These packages have a lead-free second level interconnect. The category of second Level Interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: [www.st.com](http://www.st.com).
