

Solid State Relays PCB, 1-Phase ZS

Types RP 130 ...-05, RP 130 ...-12, RP 130 ...-24

- AC Solid State Relay for PCB mounting
- Zero switching
- Rated operational current: 3 or 5 AACrms
- Non-repetitive voltage: Up to 850 V_p
- Rated operational voltage: 240 V or 440 VACrms
- 5 VDC logic compatible input
- 12 and 24 VDC inputs for interfacing PLCs and other controls
- Insulation: OPTO (input-output) 4000 VACrms

Product Description

The RP Solid State Relays from Carlo Gavazzi feature a very reliable design due to use of optotechnology together with high performance power semiconductors.

Either 3 or 5 A relays are available for AC mains up to 400 VACrms.

The zero switching version will work for resistive and inductive loads.

With snubberless triacs as output devices, dV/dt limiting RC-networks are no longer required when switching inductive loads.

Type Selection

Switching mode	Rated operational voltage	Rated operational current	Control voltage
130: Zero switching	240: 230 VACrms	3: 3 AACrms	05: 5 VDC
	440: 400 VACrms	5: 5 AACrms	12: 12 VDC
			24: 24 VDC

Housing Specifications

Weight	Approx. 10 g
Housing material	Noryl GFN 1, black
Terminals	Copper, tin-plated
Potting compound	Flame-retardant polyurethane

Applications

These relays can be used to switch heaters, motors, lights, valves or solenoids. When used at full load current, the relays must be placed vertically. If more than one relay is mounted, please allow a minimum distance of 20 mm in between for sufficient air cooling.
