

Warning Signs

Warning signs

Warning signs convey information about possible hazardous conditions.

The Health and Safety Regulations state that a safety sign must be displayed to warn persons to take precautions when a hazardous condition or situation exists.

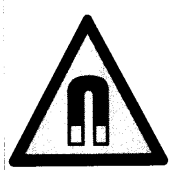

These signs are triangular with a **yellow** background covering at least 50% of the sign's surface. The sign must have a **black** contrasting frame, with any symbols also in black and centred.

For general dangers, certain symbols have been agreed by law. Dangers for which no standard symbols exist can be indicated by using general warning symbols. To ensure absolute safety it may be necessary to use additional safety text so that certain dangers can be indicated more accurately.
