A.- QUICK GUIDE (AR5 - DISTURBANCES)

Menu				Description	Options	Standard
Set-up	Circuit			Choice type of measuring circuit.	Single-phase Three-phase	Three-phase
	Record	Trigger	Level	Sensitivity level setting		1 2
			VNOM	Rated voltage of monitored power line		230 V
			HZNOM	Rated frequency of monitored power line		50 Hz
			V.LOW	% of voltage limit. Sag voltage	50% - 100%	75%
			Name	Working file name		STD-PROG
	Comm			Communication parameters setting		9600,n,8,1
	Clock			Analyzer's date and time setting		
	Contrast			Contrast.		
Run			Enabling / Disabling data recording process	Stop Run	Run	
Files	Dir			Directory of stored files		
	Delete			Deleting a file		
	Format			Clearing all memory content
