

New probes for ScopeMeter.

Probes standard supplied with the 190 series.

From Oct. 18, 2000 all ScopeMeter 190's will be delivered with new improved probes (VPS200). The improvements are the ruggedness of the probe hookclip and the isolation of the industrial grabber.

Except for the improvements, the specifications of the probes are the same. Also the standard delivered accessories with each 190 did not change. 190 series boxes containing the new probes will be marked with a sticker: Improved probes.
