## **TRIPLE OUTPUT TFT LCD PWM CONTROLLER**

### **Features**

- Complete PWM Power Control Circuitry
- Precision Reference:  $1.25V \pm 1\%$  ( $25^\circ C$ )
- Low Operating Voltage: 2.5V to 6.5V
- Under-Voltage Lockout Protection
- 5V or 3.3V Selectable Over Voltage Lockout Protection (AAT1101/A only)
- AAT1101/AAT1101A/AAT1101C: 500kHz Fixed
- AAT1101B: 50k~1MHz Programmable
- Internal Power Up Sequence Control
- Totem Pole Output
- Output Short Circuit Protection
- Low Dissipation Current: 2.5mA  
( $f=500\text{kHz}$ , Duty=50%)

### **Pin Configuration**

**TOP VIEW**

### **General Description**

The AAT1101 series provide an integrated triple-channel pulse width modulation (PWM) solution for the power supply of LCD displays. These devices offer system engineers the flexibility to tailor-make the power supply circuitry for specific applications. Each channel contains its own error amplifier, PWM comparator, dead-time control (DTC) and output driver. The under-voltage protection, over voltage protection, power sequence control, shutdown control circuit, oscillator, short circuit protection, and voltage reference circuits are the common features of the three channels. The AAT1101 series contain two exclusive boost circuits at CH1, CH3 and an exclusive buck\_boost circuit at CH2. AAT1101's Power Up sequence initiates at CH1 then CH2 and finally CH3. AAT1101A/C's Power Up sequence acts in the order of CH2, CH3, and then CH1. AAT1101B's Power Up sequence starts from CH2, CH1, and then CH3. At the completion of the Power Up sequencing, the SCP pin stays low and enters the Wait State of short circuit protection. Power Up sequencing delay and short circuit protection delay are set by connecting a capacitor to the SCP pin. Furthermore, these devices can operate with supply voltage ranging from 2.5V to 6.5V and function efficiently in an environment with low power supply. With a minimum number of external components, the AAT1101 series offer a simple and cost effective solution for TFT LCD.

## Pin Description

Pin #	Name	I/O	Description
1	IE2	I	Inverted Input of Error Amplifier 2 (EA2)
2	PRDB	O	Power Ready Output
3	V <sub>DD</sub>	I	Supply Voltage
4	OUT2	O	Channel 2 (CH2) Output
5	OUT3	O	Channel 3 (CH3) Output
6	OUT1	O	Channel 1 (CH1) Output
7	GND		Ground
8	SCP	I	Short Circuit Protection
9	V <sub>REF</sub>	O	Reference Voltage Output
10*	OVS	I/O	3.3V or 5.0V Over Voltage Selection and Over Voltage Output
10**	OSC	I/O	Frequency Setting Capacitor & Resistor Input
10***	NC		NC
11	CHC	O	Channel Control
12	PRDS	I	Power Ready Set
13	EO1	I/O	Feedback Input of Error Amplifier 1 (EA1)
14	IE1	I	Inverted Input of Error Amplifier 1 (EA1)
15	IE3	I	Inverted Input of Error Amplifier 3 (EA3)
16	SHDN	I	Shutdown Control

\*: AAT1101A only

\*\*: AAT1101B only

\*\*\*: AAT1101C only

## Absolute Maximum Ratings

CHARACTERISTICS		SYMBOL	VALUE	UNIT
Supply Voltage		V <sub>DD</sub>	8	V
Input Voltage (IE -)		V <sub>I</sub>	V <sub>DD</sub>	V
Output Voltage		V <sub>O</sub>	V <sub>DD</sub> +0.3	V
Output Current	CH1, CH3	I <sub>O</sub>	-41/+21	mA
	CH2		-21/+41	mA
Output Peak Current	Sink ( $t_w$ 2 μs, Duty 10%)	I <sub>opeak</sub>	+200	mA
	Source ( $t_w$ 2 μs, Duty 10%)		-200	
Operating Free-Air Temperature Range		T <sub>C</sub>	-20 to +85	°C
Storage Temperature Range		T <sub>storage</sub>	-45 to +125	°C
