Product Description

The Kärcher 205 M is an entry-level model with a maximum pressure of 100 bar and a flow rate of 360 l/h to easily deal with obstinate dirt and stains. Although it is very competitively priced, this unusually lightweight model (5 kg) comes with a number of features.

The unit is mounted on two wheels and has a push/pull handle for easy mobility. The integral accessory holder.

It has a pressure switch control which turns the motor on and off automatically when the trigger gun is opened and closed. This means that the user no longer has to walk back to the machine to switch it off, it helps reduce water and electricity costs and extends the life of the pump.

A chemical injector enables detergent or shampoo to be picked up from a separate container and applied in the low pressure mode, e.g. for car washing.

The unit provides high pressure for powerful cleaning and low pressure for rinsing or delicate action cleaning and applying cleaning chemicals.

Accessories offer further benefits. The Dirt Blaster, which combines the power of the pencil jet with the area coverage of a fan jet, achieves excellent results in no time.

Like all other Kärcher pressure washers, the Kärcher 205 M has been type tested by German TÜV and received the GS mark of safety approval.

Applications

Cleaning around the house, e.g. moss-covered or dirty surfaces such as facades, paths, walls, swimming pools, garden furniture and tools as well as washing vehicle special-purpose cleaning applications see special accessories.

Features and Benefit

- Totally enclosed by high-impact plastic cover.
