

2-IN-1 TILESaw-HACKSAW

TUNGSTEN CARBIDE TILESaw BLADES

TB15 Rodsaws now have
pinned ends and fit **all**
Junior Hacksaw Frames

The ABRAFILE **TILESaw-HACKSAW, TH 159**, comprises an extra deep junior hacksaw complete with a superb **Tungsten Carbide** Rodsaw, fitting directly to the frame needing neither eyelets nor adaptors. Tungsten Carbide Rodsaws are ideal for sawing-to-shape in very tough materials; in particular, these include floor and wall tiles, to fit door and window surrounds and to accommodate piping and wiring. Also supplied is a fine-tooth metal-sawing junior hacksaw blade, enabling the user to change rapidly from one application to another. The **TILESaw-HACKSAW** is a generous 90mm (3.5") deep by 150mm (6") and the card contains clear instructions.

The ABRAFILE **TILESaw BLADE, TB 15**, is the same superb **Tungsten Carbide** Rodsaw fitting directly into most all-metal junior hacksaw frames, as well as being a replacement blade for the Abrafile **TILESaw-HACKSAW**.
