	Forward current	If	CW	100	mA
	Reverse voltage	Vrl	-	2	V
Photo diode	Reverse voltage	Vrd	-	20	V

Storage temperature	Tstg		-	-40 ~ 85	°C

#### Note1

Even if the thermoelectric cooler (TEC) is operated within the rated conditions, uncontrolled current loading or operation without heat sink may easily damage the module by exceeding the storage temperature range. Thermistor resistance should be properly monitored by the feedback circuit during TEC operation to avoid the catastrophic damage.
