

## SATURN and LEDU 271

### MAGNIFY FOR PRECISION

The Saturn and the LEDU 271 magnifying lamps are specially designed for precision work, inspection, etc. They are also ideal as reading/hobby lamps at home.

The Saturn and the LEDU 271 both have a standard 3-diopter lens with 1.75 magnification. The lens is easily replaced with a more powerful one when greater magnification is required. Both models come with a spring balanced, parallel controlled arm and a universally adjustable shade to make them easy to adjust to the right position.

#### ARTICLE NUMBERS
