

SANDVIK BAHCO

Side cutting pliers

2191G

ergo®

ISO: 5749

DIN: 5749

Finish: black oxidised, anti-corrosion treated.

Material: Chrome-Vanadium steel. With Ergo handles in two-material combination. Thermoplastic surface on tough polypropylene which gives a superior grip.

Shape: an "open" joint, in which the distance from the joint centre to the cutting edges is reduced, results in greater leverage and increased cutting capacity. Equipped with return spring. Slim, round shaped jaws give improved accessibility in confined spaces.

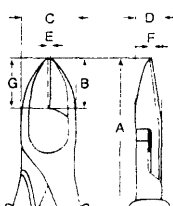

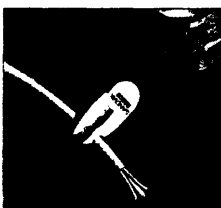

Application: sharp edges for cutting softer material such as copper wire and plastic insulated wire. Particularly useful for electricians.

Cutting capacity: hard steel wire.
