Description

The HB526A164EN belongs to 8 Byte DIMM (Dual In-line Memory Module) family, and has been developed as an optimized main memory solution for 8 Byte processor applications.

The HB526A164EN is a $512K \times 64 \times 2$ bank synchronous dynamic RAM module, mounted 4 pieces of 16-Mbit SDRAM (HM5216165TT) sealed in TSOP package and 1 pieces of serial EEPROM (24C02) for Presence Detect (PD). An outline of the HB526A164EN is 168-pin socket type package (dual lead out). Therefore, the HB526A164EN makes high density mounting possible without surface mount technology. The HB526A164EN provides common data inputs and outputs. Decoupling capacitors are mounted beside each TSOP on the module board.
