

AN7273, AN7273S

AM Tuner, FM/AM IF Amplifier Circuit

■ Overview

The AN7273 and the AN7273S are the ICs designed for Hi-Fi stereo tuner. They are functioned with stop signal pin besides the AN7223S function.

■ Features

- Level meter output (FM–AM common use)
- Stop signal output (for synthesizer tuner)
- AM : including RF amplifier and high sensitivity
- Low power consumption
- Low shock noise level from function switch operation
- Fewer external parts
