NOTE	<ol style="list-style-type: none"> 1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. 2. This is MeanWell's suggested range, please consult your battery manufacturer for their suggestions about maximum charging current limitation. 3. Derating may be needed under low input voltage. Please check the derating curve for more details. 4. Constant current operation region is within 50~100% rated output voltage. 5. The power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives.
