# Flanged External Cage Float Actuated Liquid Level Switches 

## DESCRIPTION

External cage type level switches are completely selfcontained units designed for side mounting to a tank or vessel with threaded or flanged pipe connections. In hundreds of industrial applications throughout the petroleum refining, petrochemical production and power generation markets, these switches have thoroughly demonstrated their worth for years.

## FEATURES

- Carbon steel float chamber.
- Easy inspection of float chamber through removable head.
- Stainless steel float and trim.
- Service pressures up to 900 psig ( 62 bar).
- Process temperatures up to $+1000^{\circ} \mathrm{F}\left(+538^{\circ} \mathrm{C}\right)$.
- Specific gravity ratings as low as 0.40 .
- Available switch styles including dry contact, hermetically sealed and pneumatic.
- Operating level differentials field-adjustable.
- Single or multiple switch mechanisms available.
- Available switch enclosures include:

NEMA 1 carbon steel for pneumatics
TYPE 4X/7/9 Class I, Div. 1 Groups C \& D aluminum TYPE 4X/7/9, Class I, Div. 1, Group B, aluminum

- $1^{\prime \prime}$, $1^{1 / 2 \prime}$, or $2^{\prime \prime}$ tank connections available in either NPT, socket weld, flanged side/side or flanged side/bottom construction.
- Optional high temperature insulation available. See bulletin 41-106.

## APPLICATIONS

- Accumulators - Flash tanks
- Receivers - Knockout drums
- Flare pots - Storage tanks
- Scrubbers • Separators
- Interface calibration
- Extreme temperature modifications
- Customized installation dimensions
- Special exterior surface preparation and finish
- Special tank connections
- Special actuation levels

## TECHNOLOGY

A permanent magnet (1) is attached to a pivoted switch actuator and adjustment screw (2). As the float (3) rises following the liquid level, it raises the attraction sleeve (4) into the field of the magnet, which then snaps against the non-magnetic enclosing tube (5), actuating the switch (6). The enclosing tube provides a static pressure boundary between the switch mechanism and the process. On a falling level, an inconel spring retracts the magnet, deactivating the switch.

Rising Level

Falling Level

## SPECIFICATIONS

SWITCH MECHANISMS AND ENCLOSURES

## SERIES B, C, D \& R DRY CONTACT SWITCHES

- Dry contact for most applications
- Designs for AC and DC current applications
- Process temperatures to $+1000^{\circ} \mathrm{F}\left(+538^{\circ} \mathrm{C}\right)$

## SERIES F, HS, H1, 8 \& 9 HERMETICALLY SEALED SWITCHES

- Ideal for use in salt and other corrosive atmospheres
- Positively pressurized capsules for entire mechanism and contacts
- Process temperatures to $+1000^{\circ} \mathrm{F}\left(+538^{\circ} \mathrm{C}\right)$

## SWITCH ENCLOSURES

- TYPE 4X/7/9 aluminum enclosures
- Designed to meet Class I, Div. 1, Groups C \& D and Class I, Div. 1 Group B
- Optional housing heaters and drains available for some enclosures
- Pneumatic switch mechanisms available with a NEMA 1 enclosure

| ATEX / IEC Ex ${ }^{2}$ | All with an electric switch mechanism and an ATEX housing ${ }^{(1)}$ | ATEX II 2 G EEx d IIC T6 94/9/EC <br> IEC Ex Ex d IIC T6 IP 66 |
| CE | Low Voltage Directive 2006/95/EC <br> Per Harmonized Standard: <br> EN 61010-1/1993 \& Amendment No. 1 | Installation Category II Pollution Degree 2 |

(1) Dual stage units with 'HS' or 'H1' switches are not ATEX approved.
(2) IEC Installation Instructions:

The cable entry and closing devices shall be Ex d certified suitable for the conditions of use and correctly installed.
For ambient temperatures above $+55^{\circ} \mathrm{C}$ or for process temperatures above $+150^{\circ} \mathrm{C}$, suitable heat resistant cables shall be used.
Heat extensions (between process connection and housing) shall never be insulated.

## Special conditions for safe use:

When the equipment is installed in process temperatures higher than $+85^{\circ} \mathrm{C}$ the temperature classification must be reduced according to the following table as per IEC60079-0.

| Maximum Process <br> Temperature | Temperature <br> Classification |
| :---: | :---: |
| $<85^{\circ} \mathrm{C}$ | T 6 |
| $<100^{\circ} \mathrm{C}$ | T 5 |
| $<135^{\circ} \mathrm{C}$ | T 4 |
| $<200^{\circ} \mathrm{C}$ | T 3 |
| $<300^{\circ} \mathrm{C}$ | T 2 |
| $<450^{\circ} \mathrm{C}$ | T 1 |

These units are in conformity with IECEx KEM 05.0020X
Classification Ex d IIC T6
$\mathrm{T}_{\text {ambient }}-40^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$

INCHES (mm)

Threaded and Socket Weld

Side/Bottom Flanged

| Conduit Connections D |  |
| :---: | :---: |
| Electrical Switches |  |
| TYPE 4X/7/9: | $1 " \mathrm{NPT}$ |
| Group B: | $1 " \mathrm{NPT}$ |
| Pneumatic Switches |  |
| NEMA 1: | $1 / 4 \mathrm{NPT}$ |

NOTES:

1. Switch actuating levels (HL \& LL) are given for minimum specific gravity conditions. Levels will be lower in the float chamber for higher specific gravities.
2. Standard process connections are a combination of 1" NPT and 1 " socket weld coupling.
3. Allow overhead clearance of 10 inches ( 254 mm ) for TYPE $4 \mathrm{X} / 7 / 9$ housing.

Models available for quick shipment, usually within one week after factory receipt of a complete purchase order, through the Expedite Ship Plan (ESP)

MAGNETROL REGISTERED TO

The quality assurance system in place at Magnetrol guarantees the highest level of quality throughout the company. Magnetrol is committed to providing full customer satisfaction both in quality products and quality service.

The Magnetrol quality assurance system is registered to ISO 9001 affirming its commitment to known international quality standards providing the strongest assurance of product/service quality available.

## E S P

## Expedite

 $S_{\text {hip }}$ PlanSeveral Flanged External Cage Level Switches are available for quick shipment, usually within one week after factory receipt of a complete purchase order, through the Expedite Ship Plan (ESP).

To take advantage of ESP, match the color coded model number codes in the selection charts (standard dimensions apply).

ESP service may not apply to orders of ten units or more. Contact your local representative for lead times on larger volume orders, as well as other products and options.

## WARRANTY

All Magnetrol mechanical level and flow controls are warranted free of defects in materials or workmanship for five full years from the date of original factory shipment.

If returned within the warranty period; and, upon factory inspection of the control, the cause of the claim is determined to be covered under the warranty; then, Magnetrol will repair
or replace the control at no cost to the purchaser (or owner) other than transportation. Magnetrol shall not be liable for misapplication, labor claims, direct or consequential damage or expense arising from the installation or use of equipment. There are no other warranties expressed or implied, except special written warranties covering some Magnetrol products.

[^0]:    (1) Models are limited to maximum temperature rating of selected switch mechanisms.
    (2) For single stage models only. Consult factory for multiple stages.
    (3) Model D30 recommended for Dowtherm applications.
    (4) Float cage rated 600 psig @ $+100^{\circ} \mathrm{F}\left(41\right.$ bar $\left.@+38^{\circ} \mathrm{C}\right)$ and 340 psig @ +750ํ. ( 23 bar @ +399́ C).
    (5) Process temperature based on $+100^{\circ} \mathrm{F}\left(+38^{\circ} \mathrm{C}\right)$ ambient.
    (6) Consult factory for NEMA 4X//9 cast iron housing codes.
    (7) On condensing applications, temperature down-rated to $+400^{\circ} \mathrm{F}\left(+209^{\circ} \mathrm{C}\right)$ process at $+100^{\circ} \mathrm{F}\left(+38^{\circ} \mathrm{C}\right)$ ambient.
