NOTE	All parameters NOT specia Ripple & noise are measure Tolerance : includes set up The power supply is consider.	Ill parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. Itipple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor. It olerance: includes set up tolerance, line regulation and load regulation. In power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets that it still meets are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.		

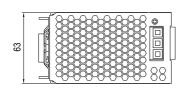

- 5. Installation clearances: 40mm on top, 20mm on the bottom, 5mm on the left and right side are recommended when loaded permanently with full power. In case the adjacent device is a heat source, 15mm clearance is recommended.
- 6. 3 seconds max., please refer to peak loading curves.
- 7. Derating may be needed under low input voltage. Please check the derating curve for more details.
- 8. After 30 minutes of burn-in.
