

TANFILM® Precision Resistor Array

ISO-9001
Registered

SON SERIES

- Available in 0.210" and 0.150" widths
- Superior temperature performance
- Absolute TC to ± 15 ppm/ $^{\circ}$ C
- Tracking to ± 2 ppm/ $^{\circ}$ C
- Military screening available
- Absolute tolerance to $\pm 0.05\%$
- Ratios to $\pm 0.01\%$
- Compatible with standard SOIC footprints

IRC's TaNFilm® Small Outline Leadless Resistor Networks is ideally suited for applications requiring precision, long term reliability and stability in a small area. Its monolithic construction eliminates vulnerable terminations such as solder connections. The SON package is ideal for the all surface mount production reflow techniques. The TaNFilm® SON Network provides all the unique qualities of our other TaNFilm® package configuration. Testing has demonstrated performance exceeding MIL-PRF-83401 characteristic H.

Precise laser trimming enables us to achieve extremely close tolerance and tight ratios. Our in-house CAD system and photo-etch process makes custom circuit configurations and multiple resistance values easily achievable. The tantalum nitride resistor film system is a refractory metal that is self passivating providing extreme temperature capabilities and superior environmental characteristics that surpass military requirements. For surface mounted resistor network applications requiring reliability, stability, accuracy and low noise characteristics in the latest leadless configurations, specify the IRC SON resistor network.

4 through 24 Terminals Available

Custom Circuits and Special Screening Available.

Specifications

Resistance Ranges (ohms)	Isolated: 50 to 100K Bussed: 50 to 50K Higher resistance values available
Standard Resistance Tolerance ($\pm\%$)	0.1, 0.5, 1, 2 (0.05 available)
Temperature Coefficient (ppm/ $^{\circ}$ C)	± 15 , ± 25 , ± 50 , ± 100
TCR Tracking	± 5 ppm/ $^{\circ}$ C standard ± 2 ppm/ $^{\circ}$ C available reference to R1
Temperature Range	-55 $^{\circ}$ C to +150 $^{\circ}$ C
Noise Level	Less than -25 db
Terminations	Gold over nickel over copper (Solder coating available)
Substrate Material	99.5% pure alumina ceramic
Construction	Ceramic "sandwich" package LXXX Conformal coat epoxy NSXX

Power Rating

Power Rating @ 70 $^{\circ}$ C (watts)	Model	Resistor	Network
NS4X, L959 & L989	0.1	0.4	
NS7X, L987 & L989	0.1	0.7	
NS8X, L998 & L999	0.1	0.8
