

## IV. SPECIFICATIONS FOR EACH SERIES

Conductive polymer type

# SEPC Series Large capacitance, low ESR

This is an even lower ESR series based on our SEP series. Suitable for use with motherboards, servers, VGA, etc.

Lead free-flow is supported.

Specifications for each series

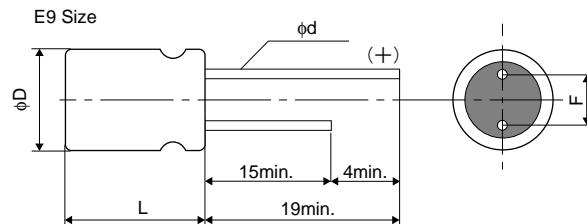

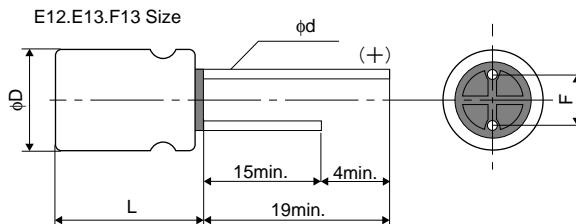

### ■ Specifications

Marking (Purple) : Polarity(⊖), Rated voltage, Rated Capacitance SANYO, OS-CON, Lot.No. SEPC.

| Items  | Conditions                               | Characteristics                           |  |              |
|--|--|---|--|--------------|
| Category temperature range                                     | —  | -55°C to +105°C                           |  |              |
| Tolerance on rated capacitance                                 | 120Hz                                    | M : ±20%                                  |  |              |
| Tangent of loss angle  | 120Hz                                    | Less than or equal to the value of Table3 |  |              |
| Leakage current ※1   | After 2 minutes                          | Less than or equal to the value of Table3 |  |              |
| ESR  | —  | Less than or equal to the value of Table3 |  |              |
| Characteristics of impedance ratio at high temp. and low temp. | Based the value at 100KHz, +20°C         | -55°C                                     | Z / Z 20°C   | 0.75 to 1.25 |
|  |  | +105°C                                    | Z / Z 20°C   | 0.75 to 1.25 |
| Endurance  | 105°C, 2,000h, Rated voltage applied     | ΔC/C                                      | Within ±20%  |              |
|  |  | tanδ                                      | 1.5 times or less than an initial standard           |              |
|  |  | ESR                                       | 1.5 times or less than an initial standard           |              |
|  |  | Leakage current                           | Below an initial standard                            |              |
| Damp heat (Steady state)                                       | 60°C, 90% RH, 1,000h, No-applied voltage | ΔC/C                                      | Within ±20%  |              |
|  |  | tanδ                                      | 1.5 times or less than an initial standard           |              |
|  |  | ESR                                       | 1.5 times or less than an initial standard           |              |
|  |  | Leakage current                           | Below an initial standard (after voltage processing) |              |
| Resistance to soldering heat                                   | Flow method (260±5°C X 10s)              | ΔC/C                                      | Within ±5%   |              |
|  |  | tanδ                                      | Below an initial standard                            |              |
|  |  | ESR                                       | Below an initial standard                            |              |
|  |  | Leakage current                           | Below an initial standard (after voltage processing) |              |

※1 In case of some problems for measured values, measure after applying rated voltage for 120 minutes at 105°C.

### ■ Dimensions

E9 size flat rubber is used.

### ■ Size List

RV : Rated voltage  
(SV) : Surge (room temperature)

| $\mu\text{F}$ | RV (SV) | 2.5 (3.3) | 4.0 (5.2) | 6.3 (8.2) | 16.0 (18.4) |  |
|---------------|---------|-----------|-----------|-----------|-------------|--|
| <b>270</b>    |         |           |           |           | E12         |  |
| <b>470</b>    |         |           |           | E9, E13   | F13         |  |
| <b>560</b>    | E9      | E9, E13   |           |           |             |  |
| <b>680</b>    |         | E13       | F13       |           |             |  |
| <b>820</b>    | E9, E13 | F13       |           |           |             |  |
| <b>1500</b>   |         |           | F13       |           |             |  |
| <b>2700</b>   | F13     |           |           |           |             |  |

| Size Code  | $\phi\text{D}+0.5\text{max.}$ | Lmax. | F            | $\phi\text{d}\pm 0.05$ |
|------------|-------------------------------|-------|--------------|------------------------|
| <b>E9</b>  | 8.0                           | 9.0   | $3.5\pm 0.5$ | 0.6                    |
| <b>E12</b> | 8.0                           | 12.0  | $3.5\pm 0.5$ | 0.6                    |
| <b>E13</b> | 8.0                           | 13.0  | $3.5\pm 0.5$ | 0.6                    |
| <b>F13</b> | 10.0                          | 13.0  | $5.0\pm 0.5$ | 0.6                    |

※For the minimum packing quantity, please refer to page 51.
