

## Sound processor for car audio BD3801FS

### Description

The BD3801FS is a sound processor IC for car audio applications. High S/N and low distortion parametric equalizer can be constructed without external capacitor by high-performance switched capacitor filter technology. Soft switch can reduce pop noise at switching volume.

### Dimension( Units: mm )

### Features

- 1 ) Slice the external parts by using switched capacitor circuit.
- 2 ) Reduce the noise of through mode by using tone-pass route.  
(8  $\mu$  Vrms)
- 3 ) Possible to realize parametric equalizer using 3 band tone, and 2 band tone and loudness.
- 4 ) Built-in ground isolation amplifier input, ideal for external stereo input and monaural input. (1 stereo input and 2 monaural input)
- 5 ) It is using a I<sup>2</sup>C BUS control. Because it is possible to use at the same time in a maximum of two.
- 6 ) BiCMOS process is suitable for the design of low current (Typ.10mA) and low energy.

### Applications

Car stereo, Mini component stereo, Micro component stereo, DVD, Personal computer, TV.
