

## Low-Voltage, Low $R_{ON}$ , Dual DPDT Analog Switch

### DESCRIPTION

The DG2015 is a dual double-pole/double-throw monolithic CMOS analog switch designed for high performance switching of analog signals. Combining low power, high speed, low on-resistance and small physical size, the DG2015 is ideal for portable and battery powered applications requiring high performance and efficient use of board space.

The DG2015 is built on Vishay Siliconix's low voltage J12 process. An epitaxial layer prevents latchup. Break-before-make is guaranteed.

The switch conducts equally well in both directions when on, and blocks up to the power supply level when off.

### FEATURES

- Halogen-free according to IEC 61249-2-21 Definition
- Low Voltage Operation (2.7 V to 3.3 V)
- Low On-Resistance -  $R_{ON}$ : 0.85  $\Omega$
- 3 dB Loss at 100 MHz
- Fast Switching:  $t_{ON} = 40$  ns  
 $t_{OFF} = 35$  ns
- QFN-16 Package
- Compliant to RoHS Directive 2002/95/EC

**RoHS**  
COMPLIANT  
HALOGEN  
**FREE**

### BENEFITS

- Reduced Power Consumption
- High Accuracy
- Reduced Board Space
- Reduce Board Space
- TTL/1.8 V Logic Compatible

### APPLICATIONS

- Cellular Phones
- Speaker Headset Switching
- Audio and Video Signal Routing
- PCMCIA Cards
- Battery Operated Systems

### FUNCTIONAL BLOCK DIAGRAM AND PIN CONFIGURATION

#### TRUTH TABLE

Logic	NC1, 2, 3 and 4	NO1, 2, 3 and 4
0	ON	OFF
1	OFF	ON

#### ORDERING INFORMATION

Temp Range	Package	Part Number
- 40 °C to 85 °C	16-pin QFN (4 mm x 4 mm)	DG2015DN-T1-E4

<b>ABSOLUTE MAXIMUM RATINGS</b> ( $T_A = 25\text{ }^\circ\text{C}$ , unless otherwise noted)			
Parameter		Limit	Unit
Reference $V_+$ to GND		- 0.3 to + 6	V
IN, COM, NC, $NO^a$		- 0.3 to ( $V_+ + 0.3$ )	
Current (Any terminal except NO, NC or COM)		30	mA
Continuous Current (NO, NC, or COM)		$\pm 150$	
Peak Current (Pulsed at 1 ms, 10 % duty cycle)		$\pm 200$	
Storage Temperature (D Suffix)		- 65 to 150	$^\circ\text{C}$
Package Solder Reflow Conditions <sup>d</sup>	16-pin QFN (4 mm x 4 mm)	240	
Power Dissipation (Packages) <sup>b</sup>	QFN-16 <sup>c</sup>	1880	

Notes:

- a. Signals on NC, NO, or COM or IN exceeding  $V_+$  will be clamped by internal diodes. Limit forward diode current to maximum current ratings.
- b. All leads welded or soldered to PC Board.
- c. Derate 23.5 mW/ $^\circ\text{C}$  above 70  $^\circ\text{C}$ .
- d. Manual soldering with iron is not recommended for leadless components. The QFN is a leadless package. The end of the lead terminal is exposed copper (not plated) as a result of the singulation process in manufacturing. A solder fillet at the exposed copper lip cannot be guaranteed and is not required to ensure adequate bottom side solder interconnection.

<b>SPECIFICATIONS</b> ( $V_+ = 3\text{ V}$ )							
Parameter	Symbol	Test Conditions Otherwise Unless Specified $V_+ = 3\text{ V}, \pm 10\%, V_{IN} = 0.4\text{ V}$ or $2\text{ V}^e$	Temp. <sup>a</sup>	Limits - 40 $^\circ\text{C}$ to 85 $^\circ\text{C}$			Unit

Power Consumption	$P_C$		Full			3.3	$\mu\text{W}$

Notes:

- a. Room = 25 °C, full = as determined by the operating suffix.
- b. Typical values are for design aid only, not guaranteed nor subject to production testing.
- c. The algebraic convention whereby the most negative value is a minimum and the most positive a maximum, is used in this data sheet.
- d. Guarantee by design, nor subjected to production test.
- e.  $V_{IN}$  = input voltage to perform proper function.
- f. Guaranteed by 5 V leakage testing, not production tested.

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

**TYPICAL CHARACTERISTICS** (25 °C, unless otherwise noted)

**$R_{ON}$  vs.  $V_{COM}$  and Supply Voltage**

**$R_{ON}$  vs. Analog Voltage and Temperature**

**Supply Current vs. Temperature**

**Supply Current vs. Input Switching Frequency**

**TYPICAL CHARACTERISTICS** (25 °C, unless otherwise noted)

**Leakage Current vs. Temperature**

**Leakage vs. Analog Voltage**

**Switching Time vs. Temperature**

**Insertion Loss, Off-Isolation Crosstalk vs. Frequency**

**Switching Threshold vs. Supply Voltage**

**Charge Injection vs. Analog Voltage**

TEST CIRCUITS

$C_L$  (includes fixture and stray capacitance)

$$V_{OUT} = V_{COM} \left( \frac{R_L}{R_L + R_{ON}} \right)$$

Logic "1" = Switch On  
Logic input waveforms inverted for switches that have the opposite logic sense.

ECN: S-21437—Rev. A, 19-Aug-02  
DWG: 5890

#### NOTES:

1. Dimensioning and tolerancing conform to ASME Y14.5M-1994.
2. All dimensions are in millimeters. All angles are in degrees.
3. N is the total number of terminals.
4. The terminal #1 identifier and terminal numbering convention shall conform to JESD 95-1 SPP-012. Details of terminal #1 identifier are optional, but must be located within the zone indicated. The terminal #1 identifier may be either a molded or marked feature. The X and Y dimension will vary according to lead counts.
5. Dimension b applies to metallized terminal and is measured between 0.25 mm and 0.30 mm from the terminal tip.
6. ND and NE refer to the number of terminals on the D and E side respectively.
7. Depopulation is possible in a symmetrical fashion.
8. Variation HHD is shown for illustration only.
9. Coplanarity applies to the exposed heat sink slug as well as the terminals.

**RECOMMENDED MINIMUM PADS FOR QFN-16 (4 x 4 MM BODY)**

	Inches	Millimeters
C1	0.142	3.60
C2	0.142	3.60
E	0.026	0.65
X1	0.014	0.35
X2	0.089	2.25
Y1	0.037	0.95
Y2	0.089	2.25

Note:  
QFN-16 (4 x 4) has an exposed center pad that must not come into contact with any metalized structure on the PCB. This area is considered a Keep Out Zone.

## Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and/or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk and agree to fully indemnify and hold Vishay and its distributors harmless from and against any and all claims, liabilities, expenses and damages arising or resulting in connection with such use or sale, including attorneys fees, even if such claim alleges that Vishay or its distributor was negligent regarding the design or manufacture of the part. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.
