Ultrabright 0603 SMD LED

DESCRIPTION

SHA

The new 0603 LED series have been designed in the smallest SMD package. This innovative 0603 LED technology opens the way to

- smaller products of higher performance
- more design in flexibility
- · enhanced applications

The 0603 LED is an obvious solution for small-scale, high power products that are expected to work reliability in an arduous environment.

The reflector inside this package is filled with a mixture of epoxy and yellow converter.

This yellow converter converts the blue emission partially to yellow, which mixes the remaining blue to give white.

FEATURES

- High efficient InGaN technology
- Smallest SMD package 0603 with exceptional brightness 1.6 mm x 0.8 mm x 0.6 mm (L x W x H)
- High reliability lead frame based
- Temperature range 40 °C to + 100 °C
- Chromaticity coordinate categorized according to CIE1931 per packing unit
- Typical color temperature 5500 K
- EIA and ICE standard package
- Compatible with IR reflow, vapor phase and wave solder processes acc. to CECC 00802 and J-STD-020C
- Available in 8 mm tape reel
- · Lead (Pb)-free device
- Preconditioning: according to JEDEC level 2
- Component in accordance to RoHS 2002/95/EC and WEEE 2002/96/EC
- ESD-withstand voltage: up to 1 kV according to JESD22-A114-B

APPLICATIONS

- Automotive: backlighting in dashboards, switches and keypads
- Telecommunication: indicator and backlighting in telephone and fax
- · Backlighting for audio and video equipment
- Backlighting in office equipment
- Indoor and outdoor message boards
- Flat backlight for LCDs, switches and symbols

PRODUCT GROUP AND PACKAGE DATA

- Product group: LED
- Package: SMD 0603
- Product series: standard
- Angle of half intensity: ± 80°

PARTS TABLE					
PART	COLOR, LUMINOUS INTENSITY	TECHNOLOGY			
VLMW11R2S2-5K8L-08	White, $I_V = (140 \text{ to } 280) \text{ mcd}$	InGaN/yellow converter			

Vishay Semiconductors

PARAMETER	TEST CONDITION	SYMBOL	VALUE	UNIT
Reverse voltage ²⁾	I _R max = 10 μA	V _R	5	V
DC forward current	$T_{amb} \le 60 \ ^{\circ}C$	۱ _F	20	mA
Surge forward current	$t_p \le 10 \ \mu s$	I _{FSM}	0.1	А
Power dissipation		P _V	80	mW
Junction temperature		Тj	100	°C
Storage temperature range		T _{stg}	- 40 to + 100	°C
Operating temperature range		T _{amb}	- 40 to + 100	°C
Thermal resistance junction/ ambient	mounted on PC board (pad size > 16 mm ²)	R _{thJA}	480	K/W

Note:

¹⁾ $T_{amb} = 25 \,^{\circ}C$, unless otherwise specified

²⁾ Driving the LED in reverse direction is suitable for short term application

PARAMETER	TEST CONDITION	PART	SYMBOL	MIN	TYP.	MAX	UNIT
Luminous intensity	I _F = 10 mA	VLMW11R2S2	Ι _V	140		280	mcd
Chromaticity coordinate x acc. to CIE 1931	I _F = 10 mA	VLMW11	х		0.33		
Chromaticity coordinate y acc. to CIE 1931	I _F = 10 mA	VLMW11	У		0.33		
Angle of half intensity	I _F = 10 mA		φ		± 80		deg
Forward voltage	I _F = 20 mA		V _F	2.9		4.0	V
Temperature coefficient of V_F	I _F = 10 mA		TC _{VF}		- 3		mV/K
Temperature coefficient of IV	I _F = 10 mA		TCIV		- 0.4		%/K

Note:

¹⁾ $T_{amb} = 25$ °C, unless otherwise specified

LUMINOUS INTENSITY CLASSIFICATION				
GROUP	LIGHT INTENSITY (MCD)			
STANDARD	OPTIONAL	MIN	МАХ	
R	-	-	-	
	2	140	180	
S	1	180	224	
	2	224	280	

Note:

Luminous intensity is tested at a current pulse duration of 25 ms and an accuracy of \pm 11 %.

The above type numbers represent the order groups which include only a few brightness groups. Only one group will be shipped on each reel (there will be no mixing of two groups on each reel). In order to ensure availability, single brightness groups are not be orderable.

In a similar manner for colors where wavelength groups are measured and binned, single wavelength groups will be shipped on any one reel.

In order to ensure availability, single wavelength groups are not be orderable.

CROSSING TABLE

SOLDERING PROFILE

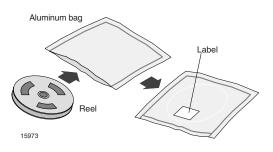

BAR CODE PRODUCT LABEL EXAMPLE:

- A) Type of component
- B) Manufacturing plant
- C) SEL selection code (bin):
 - e.g.: R1 = code for luminous intensity group 5L = code for chrom. coordinate group
- D) Date code year/week
- E) Day code (e.g. 4: Thursday)
- F) Batch no.
- G) Total quantity
- H) Company code

DRY PACKING

The reel is packed in an anti-humidity bag to protect the devices from absorbing moisture during transportation and storage.

FINAL PACKING

The sealed reel is packed into a cardboard box. A secondary cardboard box is used for shipping purposes.

RECOMMENDED METHOD OF STORAGE

Dry box storage is recommended as soon as the aluminium bag has been opened to prevent moisture absorption. The following conditions should be observed, if dry boxes are not available:

- Storage temperature 10 °C to 30 °C
- Storage humidity \leq 60 % RH max.

After more than 1 year under these conditions moisture content will be too high for reflow soldering.

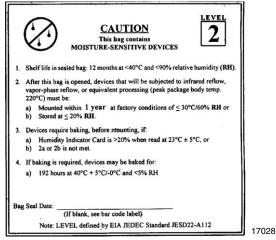

In case of moisture absorption, the devices will recover to the former condition by drying under the following condition:

192 h at 40 °C + 5 °C/- 0 °C and < 5 % RH (dry air/ nitrogen) or

96 h at 60 $^{\circ}\text{C}$ + 5 $^{\circ}\text{C}$ and < 5 % RH for all device containers or

24 h at 100 $^{\circ}$ C + 5 $^{\circ}$ C not suitable for reel or tubes.

An EIA JEDEC Standard JESD22-A112 level 2 label is included on all dry bags.

Example of JESD22-A112 level 2 label

ESD PRECAUTION

Proper storage and handling procedures should be followed to prevent ESD damage to the devices especially when they are removed from the antistatic shielding bag. Electro-static sensitive devices warning labels are on the packaging.

VISHAY SEMICONDUCTORS STANDARD BAR CODE LABELS

The Vishay Semiconductors standard bar code labels are printed at final packing areas. The labels are on each packing unit and contain Vishay Semiconductors specific data.

Ozone Depleting Substances Policy Statement

It is the policy of Vishay Semiconductor GmbH to

- 1. Meet all present and future national and international statutory requirements.
- 2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

Vishay Semiconductor GmbH has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

- 1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
- 2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
- 3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

Vishay Semiconductor GmbH can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

We reserve the right to make changes to improve technical design and may do so without further notice.

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay Semiconductors products for any unintended or unauthorized application, the buyer shall indemnify Vishay Semiconductors against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.
