## Low Capacitance 4 Line EMI Filter with ESD Protection in UDFN8 Package

This device is a 4 line EMI filter array for wireless applications. Greater than -20 dB typical attenuation is obtained at frequencies from 800 MHz to 5.0 GHz. The NUF4010MU has a typical cut-off frequency of 250 MHz. This UDFN package is specifically designed to enhance EMI filtering for low-profile or slim design electronics especially where space and height is a premium. It also offers ESD protection—clamping transients from static discharges. ESD protection is provided across all capacitors.

## MAXIMUM RATINGS

| Parameter   | Symbol    | Value      | Unit |
|---|-----------|------------|------|
| ESD Discharge IEC61000-4-2 Contact Discharge                                      | $V_{PP}$  | 8.0        | kV   |
| Operating Temperature Range   | $T_{OP}$  | -40 to 85  | °C   |
| Storage Temperature Range   | $T_{STG}$ | -55 to 150 | °C   |
| Maximum Lead Temperature for Soldering Purposes (1.8 in from case for 10 seconds) | $T_L$     | 260        | °C   |

Maximum ratings are those values beyond which device damage can occur. Maximum ratings applied to the device are individual stress limit values (not normal operating conditions) and are not valid simultaneously. If these limits are exceeded, device functional operation is not implied, damage may occur and reliability may be affected.
