	NO OF WIRES PER CONDICTOR	7
WIRE 1 = 0.10MM 2 = 0.20MM 3 = 0.315MM	NOMINAL DIAMETER OF EACH	2
NO OF CORES	NO DE COBES	4
A - TINNED CONDUCTORS INSULATED WITH PVC TO BS6746 TYPE 2, OVERALL SHEATHED WITH PVC TO BS6746 TYPE 6. R&C - TINNED CONDUCTORS INSULATED WITH PVC TO BS6746 TYPE 2, COLLECTIVELY SCREENED BRAID CONSTRUCTION USING TINNED, ANNEALED COPPER WIRE. FILL FACTOR OF DENSITY OF BRAID NOT TO BE LESS THAN 0.70. OVERALL SHEATHED WITH PVC TO BS6746 TYPE 6. D - TINNED CONDUCTORS INSULATED WITH PVC BS6746 TYPE 2, INDIVIDUALLY SCREENED BRAID CONSTRUCTION USING TINNED ANNEALED COPPER WIRE. FILL FACTOR OF DENSITY OF BRAID NOT TO BE LESS THAN 0.45. OVERALL SHEATHED WITH PVC TO BS6746 TYPE 6.		C

714 - 768 70 951

sizes), and Part 5 (for standard sizes) These standard, miniature sub-miniature cables are manufactured to Ministry of Defence, Defence standard 61-12 Part 4 (for miniature and sub-miniature

in Def 61-12 parts 4 and 5 is not less than 0.70 for C and R types and 0.45 for D types. All types are overall sheathed with Black or Grey PVC to BS6746 type , and individually screened types D have a screen of braid construction conductivity tinned annealed copper wire. The fill factor of density of braid as defined The cores have tinned conductors of high conductivity annealed copper insulated with PVC compound to BS6746 type 2. Collectively screened types C and R

such purposes are listed in our cable section titled "Flexible Mains Cord" which are manufactured to BS6500. Because of the mechanical design of these cables they should not be used for direct connection of equipment's to mains power supplies. Cables suitable for extensively used in aircraft, avionic control systems, computers, data processors, process control systems, military vehicles and ancillary military equipment. These multicore flexible cables are designed for high density wiring between components and within instruments and electronic equipment. They are

industry, We are manufacturing these configurations in conformance with specifications for similar cables included in the defence standard core number and sheath colours not specifically listed in Defence Standard 61-12 Parts 4 or 5. Because of their suitability for applications in the electronics 16-2-8C, 16-2-50C, 16-2-36A, 16-2-8A, 7-2-8A, 7-2-20A, 7-2-8C, 7-2-10C, 7-2-15C, 7-2-20C, 7-1-9C, 7-1-15C, 7-1-9A, 7-1-15A and grey sheathed types, are

Colour Rotation of Cores

The sequence of colours used for core identifications as follows:
Red: Blue: Green: Yellow: White: Black: Brown: Violet: Orange: Pink: Turquoise: Grey: Red/Blue: Green/Red: Yellow/Red: White/Red: Red/Black: Grey/Green: Yellow/Brown: White/Brown: Brown/Black: Grey/Brown: Yellow/Violet: Violet/Black: White/Violet. Red/Brown: Yellow/Blue: White/Blue: Blue/Black: Orange/Blue: Green/Blue: Grey/Blue: Yellow/Green: White/Green: Green/Black: Orange/Green:

For bicolours; first colour ground, second colour tracer

Core colours for 25 core cable are as above, excluding Green/Blue, Grey/Blue and Green/Black

Core colours for 16-2-10C are as follows: White cores each paired with Blue, Orange, Green, Brown and Grey

White cores, third layer Red, Blue and 20 White cores Core colours for 50 core cables are as follows: Centre cores Red, Blue and White, first layer Red, Blue and 7 seven white cores, second layer Red, Blue and

Third layer Red, Blue and 16 White cores. Core colours for 16-2-60C are as follows: Centre core dummy first layer Red, Blue and 4 White cores. Second layer Red, Blue and 10 White cores
