Premium Multiple Line Coax Cables - Feature Braid and Mylar Shields in 0.1" Dia. Size

These extraordinary low loss coaxials are particularly suitable for transmission of RGB signals over extended distances without worry of signal deterioration or crosstalk. Each individual Slimline coaxial has a typical 75 ohm impedance and a full shield coverage comprised of a copper braid and mylar shield. Color coaxials are typically Red, Green, Blue, Black and Gray. Outer appearance is black including molded strain reliefs.

3 Thin-Line Coax Cables - Formed into a Light Weight Cable w/RGB/VGA Color Ident.

Low loss coaxial cables are suitable for transmitting RGB video signals. Light weight and flexibility make these cables ideal for graphic systems connections. Coaxial color identity is: Red, Green, Blue, Black & Gray.
