# SST12CP21

## 2.4 GHz High-Gain, High-Efficiency Power Amplifier

### Features

- High Gain:
  - Typically 39 dB gain across 2.4–2.5 GHz over temperature -20°C to +85°C
- High linear output power:
  - >30 dBm P1dB
    - Please refer to "Absolute Maximum Stress Ratings" on page 5
  - Meets 802.11g OFDM spectrum mask requirement up to 28 dBm
  - Typically 25 dBm with <3% EVM, 802.11g, 54 Mbps, 350 mA current
  - Typically 24 dBm with <2.5% EVM, 802.11n, MCS7-HT20, 50% duty cycle
  - Typically 23 dBm with <1.75% EVM, MCS9-HT40, 50% duty cycle, 320 mA current
  - Meets 802.11b ACPR requirement up to 28 dBm with 30% power-added efficiency
- High-speed power-up/down
  - Turn on/off time (10%-90%) <100 ns
- 10:1 VSWR survivability (unconditionally stable up to 28 dBm)
- On-chip power detection
  - >20 dB dynamic range
  - VSWR- and temperature-insensitive
- Simple input/output matching
- Packages available
  - 16-contact UQFN (3mm x 3mm)
- All non-Pb (lead-free) devices are RoHS compliant

### Applications

- WLAN (IEEE 802.11b/g/n)
- WLAN 256 QAM
- AP router
- Home RF
- Cordless phones
- 2.4 GHz ISM wireless equipment

## 1.0 PRODUCT DESCRIPTION

SST12CP21 is a high-power and high-gain power amplifier (PA) based on the highly-reliable InGaP/GaAs HBT technology.

This PA can be easily configured for high-power applications with high power-added efficiency while operating over the 2.4-2.5 GHz frequency band. It typically provides 39 dB gain with 25% power-added efficiency @ $P_{OUT}$ = 28 dBm for 802.11g.

SST12CP21 has excellent linearity, typically 25 dBm at 3% EVM with 54 Mbps 802.11g operation while meeting 802.11g spectrum mask at 28 dBm. SST12CP21 also has a single-ended power detector which lowers the users' cost for power control.

The power amplifier IC also features easy board-level usage along with high-speed power-up/-down control.

SST12CP21 is offered in 16-contact UQFN package. See Figure 3-1 for pin assignments and Table 4-1 for pin descriptions.

## TO OUR VALUED CUSTOMERS

It is our intention to provide our valued customers with the best documentation possible to ensure successful use of your Microchip products. To this end, we will continue to improve our publications to better suit your needs. Our publications will be refined and enhanced as new volumes and updates are introduced.

If you have any questions or comments regarding this publication, please contact the Marketing Communications Department via E-mail at **docerrors@microchip.com**. We welcome your feedback.

### Most Current Data Sheet

To obtain the most up-to-date version of this data sheet, please register at our Worldwide Web site at:

**http://www.microchip.com**

You can determine the version of a data sheet by examining its literature number found on the bottom outside corner of any page. The last character of the literature number is the version number, (e.g., DS30000000A is version A of document DS30000000).

### Errata

An errata sheet, describing minor operational differences from the data sheet and recommended workarounds, may exist for current devices. As device/documentation issues become known to us, we will publish an errata sheet. The errata will specify the revision of silicon and revision of document to which it applies.

To determine if an errata sheet exists for a particular device, please check with one of the following:

- Microchip's Worldwide Web site; **http://www.microchip.com**
- Your local Microchip sales office (see last page)

When contacting a sales office, please specify which device, revision of silicon and data sheet (include literature number) you are using.

### Customer Notification System

Register on our web site at **www.microchip.com** to receive the most current information on all of our products.

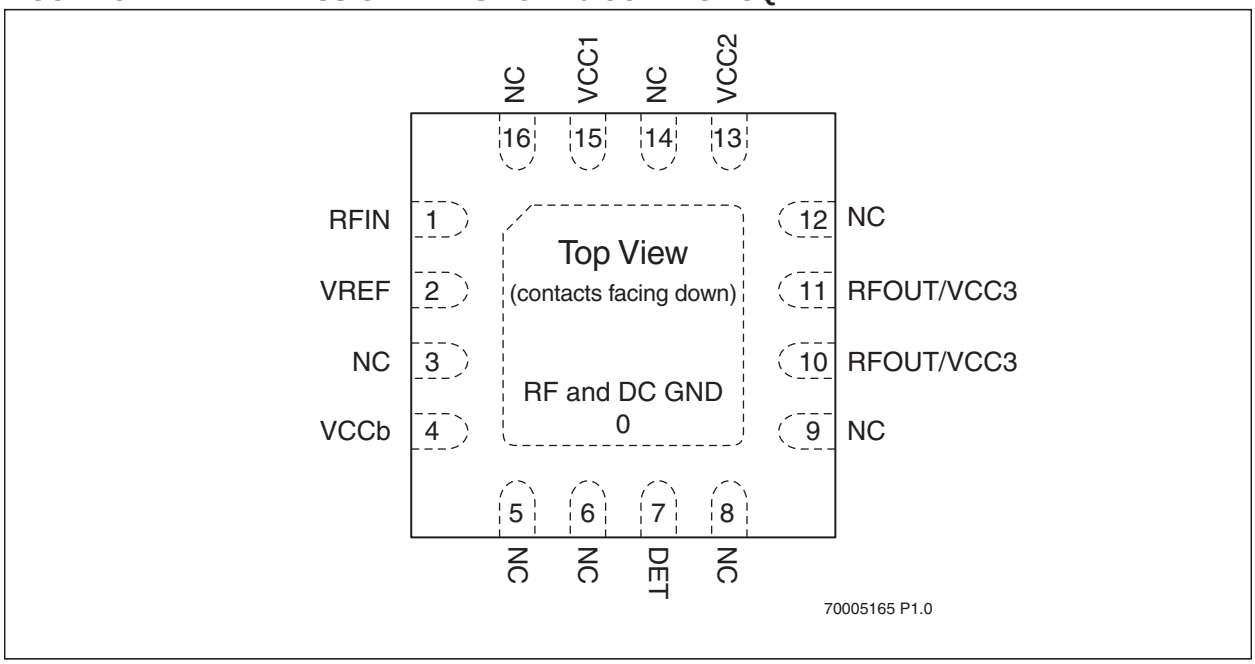
**FIGURE 3-1: PIN ASSIGNMENTS FOR 16-CONTACT UQFN**



## 4.0 PIN DESCRIPTIONS

**TABLE 4-1: PIN DESCRIPTION**

| Symbol | Pin No. | Pin Name | Type[1] | Function |
|---|---|---|---|---|
| GND | 0 | Ground | | The center pad should be connected to RF ground |
| RFIN | 1 | $RF_{IN}$ | I | RF input, DC decoupled |
| VREF | 2 | $V_{REF}$ | PWR | PA enable and idle-current control |
| NC | 3 | No Connection | | No Internal Connection |
| VCCb | 4 | Power Supply | PWR | Supply voltage for bias circuit |
| NC | 5 | No Connection | | No Internal Connection |
| NC | 6 | No Connection | | No Internal Connection |
| VDET | 7 | $V_{DET}$ | O | On-chip power detector |
| NC | 8 | No Connection | | No Internal Connection |
| NC | 9 | No Connection | | No Internal Connection |
| RFOUT | 10 | $RF_{OUT}$ | O | RF output |
| RFOUT | 11 | $RF_{OUT}$ | O | RF output |
| NC | 12 | No Connection | | No Internal Connection |
| VCC2 | 13 | $V_{CC2}$ | PWR | PWR power supply, 2nd stage |
| NC | 14 | NC | | No Internal Connection |
| VCC1 | 15 | $V_{CC1}$‘ | PWR | PWR power supply, 1st stage |
| NC | 16 | No Connection | | No Internal Connection |

1. I=Input, O=Output

## 5.0 ELECTRICAL SPECIFICATIONS

The DC and RF specifications for the power amplifier are specified below. Refer to Table 5-2 for the DC voltage and current specifications.

**Absolute Maximum Stress Ratings** (Applied conditions greater than those listed under "Absolute Maximum Stress Ratings" may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these conditions or conditions greater than those defined in the operational sections of this data sheet is not implied. Exposure to absolute maximum stress rating conditions may affect device reliability.)

Input power to pin 1 ($P_{IN}$)[1] . . . . . +12 dBm
Supply voltage at pins 4, 10, 11, 13 and 15 ($V_{CC}$) . . . . . +6 V
Reference voltage to pin 2 ($V_{REF1}$) . . . . . +3.2 V
DC supply current ($I_{CC}$) . . . . . 600 mA
Operating Temperature ($T_A$) . . . . . -40ºC to +85ºC
Storage Temperature ($T_{STG}$) . . . . . -40ºC to +120ºC
Maximum Junction Temperature ($T_J$) . . . . . +150ºC
Surface Mount Solder Reflow Temperature . . . . . 260°C for 10 seconds

1. Maximum input power for $V_{CC}$ = 5V with 50% duty cycle, 802.11g 54 Mbps, with maximum output VSWR = 10:1. At $V_{CC}$ = 5V, a 10Ω resistor must be included on $V_{CC1}$, as shown in Figures 6-8 and 6-9.

**TABLE 5-1: OPERATING RANGE**

| Range | Ambient Temp | $V_{CC}$ |
|---|---|---|
| Industrial | -20°C to +85°C | 5.0V |

**TABLE 5-2: DC ELECTRICAL CHARACTERISTICS AT 25ºC**

| Symbol | Parameter | Min. | Typ | Max. | Unit |
|---|---|---|---|---|---|
| $V_{CC}$ | Supply Voltage | 4.0 | 5.0 | 5.5 | V |
| $I_{CC}$ | DC Current | | | | |
| | for 802.11g, 28 dBm | | 440 | | mA |
| | for 802.11b, 28 dBm | | 440 | | mA |
| $I_{CQ}$ | Idle Current | | 275 | | mA |
| $V_{REG}$ | Reference Voltage see Figure 6-8 on page 10 | 2.9 | 2.95 | 3.1 | V |
| $I_{REG}$ | Reference Current | | 8 | | mA |

**TABLE 5-3: AC ELECTRICAL CHARACTERISTICS FOR CONFIGURATION AT $V_{CC}$ = 5V, $V_{REF}$ = 2.95V, 25ºC, 50% DUTY CYCLE**

| Symbol | Parameter | Min. | Typ | Max. | Unit |
|---|---|---|---|---|---|
| $F_{L-U}$ | Frequency range in 802.11b/g applications | 2400 | | 2500 | MHz |
| $P_{OUT}$ | Output power at 3% EVM with 802.11g OFDM at 54 Mbps | | 25 | | dBm |
| | Output power at 2.5% EVM with 802.11n MCS7 HT20 | | 24 | | dBm |
| | Output power at 1.75% EVM with 256 QAM MCS9 HT40 | | 23 | | dBm |
| | Output power meeting 802.11g spectral mask, 6 Mbps | | 28 | | dBm |
| | Output power meeting 802.11n HT20 spectral mask | | 26 | | dBm |
| | Output power meeting MCS9-HT40 spectral mask | | 26 | | dBm |
| | Output power meeting 802.11b spectral mask with 11 Mbps CCK | | 28 | | dBm |
| G | Power gain for 802.11b/g/n/256 QAM | 37 | 39 | | dB |
| $G_{VAR}$ | Gain variation over band | | | ±0.5 | dB |
| 2f | Second Harmonic at 29 dBm, 802.11b mask compliance[1] | | -50 | | dBm/MHz |
| 3f | Third Harmonic at 29 dBm, 802.11b mask compliance[1] | | -50 | | dBm/MHz |

1. See Figure 6-9

## 6.0 TYPICAL PERFORMANCE CHARACTERISTICS

**Test Conditions: $V_{CC}$ = 5.0V, $V_{REG}$ = 2.95V, $T_A$ = 25°C, IEEE 802.11g, 54 Mbps, 50% duty cycle unless otherwise specified**

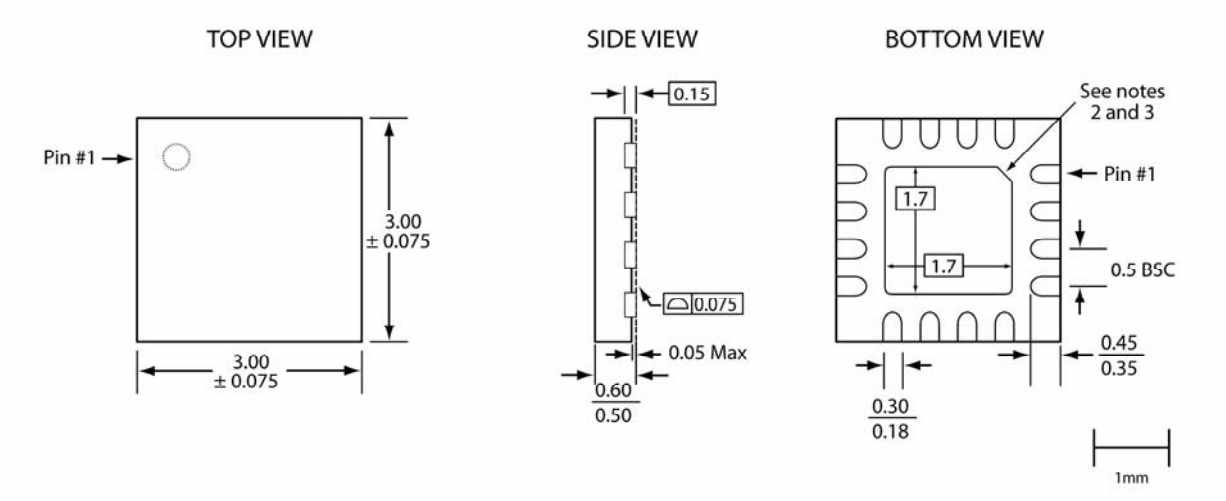
## 7.0 PACKAGING DIAGRAMS

### 16-Lead Ultra Thin Quad Flatpack No-Leads (QUCE/F) - 3x3 mm Body [UQFN]

**Note:** For the most current package drawings, please see the Microchip Packaging Specification located at http://www.microchip.com/packaging



16-uqfn-3x3-QUC-0.0

Note:

1. Complies with JEDEC JEP95 MO-248D, variant UEED-4 except external paddle nominal dimensions.
2. From the bottom view, the pin #1 indicator may be either a 45-degree chamfer or a half-circle notch.
3. The external paddle is electrically connected to the die back-side and possibly to certain VSS leads. This paddle can be soldered to the PC board; it is suggested to connect this paddle to the VSS of the unit. Connection of this paddle to any other voltage potential can result in shorts and/or electrical malfunction of the device
4. Untoleranced dimensions are nominal target dimensions.
5. All linear dimensions are in millimeters (max/min).

## THE MICROCHIP WEB SITE

Microchip provides online support via our WWW site at www.microchip.com. This web site is used as a means to make files and information easily available to customers. Accessible by using your favorite Internet browser, the web site contains the following information:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQ), technical support requests, online discussion groups, Microchip consultant program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

## CUSTOMER CHANGE NOTIFICATION SERVICE

Microchip's customer notification service helps keep customers current on Microchip products. Subscribers will receive e-mail notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, access the Microchip web site at www.microchip.com. Under "Support", click on "Customer Change Notification" and follow the registration instructions.

## CUSTOMER SUPPORT

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Field Application Engineer (FAE)
- Technical Support

Customers should contact their distributor, representative or Field Application Engineer (FAE) for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in the back of this document.

**Technical support is available through the web site at: http://microchip.com/support**

 

## 8.0 PRODUCT IDENTIFICATION SYSTEM

To order or obtain information, e.g., on pricing or delivery, refer to the factory or the listed sales office.

**PART NO.** **XXX**

**Device** **Package**

| | | |

**Valid Combinations:**

SST12CP21-QUCE
SST12CP21-QUCE-K

**Note the following details of the code protection feature on Microchip devices:**

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

**QUALITY MANAGEMENT SYSTEM**
**CERTIFIED BY DNV**
**═ ISO/TS 16949 ═**

*Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company's quality system processes and procedures are for its PIC® MCUs and dsPIC® DSCs, KEELOQ® code hopping devices, Serial EEPROMs, microperipherals, nonvolatile memory and analog products. In addition, Microchip's quality system for the design and manufacture of development systems is ISO 9001:2000 certified.*
