

Time Flash Oscillator Programming Kit without Socket Cards

Part Number: DSC-TIMEFLASH

The TimeFlash programmer allows users to rapidly program Microchip's field programmable MEMS oscillator to a custom frequency in seconds, minimizing design time by enabling fast prototyping and testing. Our MEMS oscillators are available in industry standard packages that are drop-in replacements to standard crystal oscillators.

This kit does not include socket cards. Please order socket cards separately.

Features

- Custom frequencies in seconds with immediate design verification
- Supports all Microchip MEMS oscillator package sizes
- Supports CMOS, LVPECL, LVDS, and HCSL output types
- Easy to use interface with auto software update
