3. MATERIALS :

(a) Core : Ferrite

(b) Wire : Copper Wire

(c) Terminal : Tin (Pb free)

(d) Adhesive : UV or Epoxy

4. GENERAL SPECIFICATION :

- a) Test frequency : Inductor(L) : 10KHz /0.1V;
- b) All test data referenced to 25° C ambient.
- c) Operating Temperature : -40~+125° C
- d) Storage Temperature (on board) : -40~+125° C
- e) Irms will cause the coil temperature rise approximately Δt of 20°C.
- f) The part temperature (ambient + temp rise) should not exceed 85° C under worst case operating conditions.

8. SOLDERING AND MOUNTING :

8-1. Attention regarding P.C.B. bending :

The following shall be considered when designing and laying out P.C.B.'S

(1)P.C.B. shall be designed so that products are not subjected to the mechanical stress for board warpage.

<Products direction>

Products shall be located in the sideways direction (Length:a<b) to against the mechanical stress.

(2) Products location on P.C.B

Products (A,B,C,D) shall be located carefully to prevent mechanical stress when warping the board. Products may be subjected to the mechanical stress in the order of A>C>B = D.

8-2. Soldering

Mildly activated rosin fluxes are preferred. Our terminations are suitable for all wave and re-flow soldering systems. If hand soldering cannot be avoided, the preferred technique is the utilization of hot air soldering tools.

8-2.1 Solder Re-flow :

Recommended temperature profiles for re-flow soldering in Figure 1.

8-2.2 Soldering Iron (Figure 2) :

Products attachment with a soldering iron is discouraged due to the inherent process control limitations. In the event that a soldering iron must be employed the following precautions are recommended.

Note :

- a) Preheat circuit and products to 150°C
- b) 355°C tip temperature (max)
- c) Never contact the ceramic with the iron tip
- d) 1.0mm tip diameter (max)
- e) Use a 20 watt soldering iron with tip diameter of 1.0mm
- f) Limit soldering time to 4-5 sec.

9-4. Tearing Off Force

The force for tearing off cover tape is 10 to 80 grams in the arrow direction under the following conditions. (referenced ANSI/EIA-481-C-2003 of 4.11 standard)

Room Temp. (° C)	Room Humidity (%)	Room atm (hPa)	Tearing Speed (mm/min)
5-35	45-85	860-1060	300

Application Notice

1. Storage Conditions :

To maintain the solderability of terminal electrodes :

- a) Temperature and humidity conditions : Less than 40° C and 60% RH.
- b) Recommended products should be used within 12 months from the time of delivery.
- c) The packaging material should be kept where no chlorine or sulfur exists in the air.

2. Transportation :

- a) Products should be handled with care to avoid damage or contamination from perspiration and skin oils.
- b) The use of tweezers or vacuum pick up is strongly recommended for individual components.
- c) Bulk handling should ensure that abrasion and mechanical shock are minimized.

RoHS Compliant
