## FAIRCHILD

SEMICONDUCTOR

# 74VCXH162373

# Low Voltage 16-Bit Transparent Latch with Bushold and $26\Omega$ Series Resistors in Outputs

#### **General Description**

The VCXH162373 contains sixteen non-inverting latches with 3-STATE outputs and is intended for bus oriented applications. The device is byte controlled. The flip-flops appear to be transparent to the data when the Latch enable (LE) is HIGH. When LE is LOW, the data that meets the setup time is latched. Data appears on the bus when the Output Enable ( $\overline{OE}$ ) is LOW. When  $\overline{OE}$  is HIGH, the outputs are in a high impedance state.

The VCXH162373 data inputs include active bushold circuitry, eliminating the need for external pull-up resistors to hold unused or floating data inputs at a valid logic level.

The VCXH162373 is also designed with  $26\Omega$  series resistors in the outputs. This design reduces line noise in applications such as memory address driver, clock drivers and bus transceivers/transmitters.

The 74VCXH162373 is designed for low voltage (1.65V to 3.6V)  $V_{CC}$  applications with output compatibility up to 3.6V.

The 74VCXH162373 is fabricated with an advanced CMOS technology to achieve high speed operation while maintaining low CMOS power dissipation.

#### Features

- 1.65V–3.6V V<sub>CC</sub> supply operation
- 3.6V tolerant control inputs and outputs
- Bushold on data inputs eliminates the need for external pull-up/pull-down resistors

January 2000

Revised March 2000

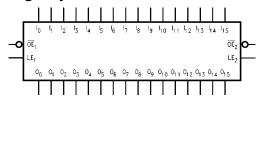

- 26Ω series resistors in outputs
- t<sub>PD</sub> (I<sub>n</sub> to O<sub>n</sub>) 3.3 ns max for 3.0V to 3.6V V<sub>CC</sub>
  - 4.5 ns max for 2.3V to 2.7V V<sub>CC</sub> 9.0 ns max for 1.65V to 1.95V V<sub>CC</sub>
- Static Drive (I<sub>OH</sub>/I<sub>OL</sub>) ±12 mA @ 3.0V V<sub>CC</sub> ±8 mA @ 2.3V V<sub>CC</sub>
  - ±3 mA @ 1.65V V<sub>CC</sub>
- Uses patented noise/EMI reduction circuitry
- Latch-up performance exceeds 300 mA
- ESD performance: Human body model > 2000V Machine model > 200V

### **Ordering Code:**

Ordering Number	Package Number	Package Description
74VCXH162373MTD	MTD48	48-Lead Thin Shrink Small Outline Package (TSSOP), JEDEC MO-153, 6.1mm Wide [TUBES]
74VCXH162373MTX (Note 1)	MTD48	48-Lead Thin Shrink Small Outline Package (TSSOP), JEDEC MO-153, 6.1mm Wide [TAPE and REEL]

Note 1: Use this Order Number to receive devices in Tape and Reel.

#### **Functional Description**

The 74VCXH162373 contains sixteen edge D-type latches with 3-STATE outputs. The device is byte controlled with each byte functioning identically, but independent of the other. Control pins can be shorted together to obtain full 16-bit operation. The following description applies to each byte. When the Latch Enable (LEn) input is HIGH, data on the  ${\rm I}_{\rm n}$  enters the latches. In this condition the latches are transparent, i.e., a latch output will change state each time
