## **Balanced Three-chip SIDACtor Device**

This balanced protector is a surface mount alternative to the modified TO-220 package. Based on a six-pin surface mount SOIC package, it uses Teccor's patented "Y" (US Patent 4,905,119) configuration. It is available in surge current ratings up to 500 A.

SIDACtor devices are used to enable equipment to meet various regulatory requirements including GR 1089, ITU K.20, K.21, and K.45, IEC 60950, UL 60950, and TIA-968 (formerly known as FCC Part 68).

\* For individual "UA", "UB", and "UC" surge ratings, see table below. \*\* Asymmetrical

General Notes:

All measurements are made at an ambient temperature of 25 °C. IPP applies to -40 °C through +85 °C temperature range.

· IPP is a repetitive surge rating and is guaranteed for the life of the product.

• Listed SIDACtor devices are bi-directional. All electrical parameters and surge ratings apply to forward and reverse polarities.

V<sub>DRM</sub> is measured at I<sub>DRM</sub>.

V<sub>S</sub> is measured at 100 V/µs.

· Special voltage (V<sub>S</sub> and V<sub>DRM</sub>) and holding current (I<sub>H</sub>) requirements are available upon request.

• Off-state capacitance is measured between Pins 1-3 and 1-4 at 1 MHz with a 2 V bias and is a typical value for "UA", "UB", and "UC" products.

Device is designed to meet balance requirements of GTS 8700 and GR 974.
