DESCRIPTION AND APPLICATIONS:

Bipolarics' BPT1819E03 is a high performance silicon bipolar transistor intended for linear power applications at frequencies of 1.8 to 1.9 GHz. Typical applications include amplifiers in aeronautical, maritime and personal communication applications. The BPT1819E03 is bonded common emitter for linear applications. Linear output power of 3 Watts can be achieved. BeO flange packaging makes this device excellent for industrial and military products. Uniformity and reliability are assured by the use of ion implanted junctions, ion implanted ballast resistors and gold metallization.
