## Low Power Peak EMI Reducing Solution

## **Features**

- Generates an EMI optimized clocking signal at the output.
- Integrated loop filter components.
- Operates with a 3.3V ±10% supply.
- Operating current less than 6mA.
- Low power CMOS design.
- Input frequency range: 15MHz to 30MHz.
- Generates a 1X low EMI spread spectrum clock of the input frequency.
- Frequency deviation: ±1%.
- Available in 6-pin TSOT-23, 8-pin SOIC and 8-pin TSSOP packages.

#### **Product Description**

The ASM3P2779A is a versatile spread spectrum frequency modulator designed specifically for a wide range of clock frequencies. The ASM3P2779A reduces electromagnetic interference (EMI) at the clock source, allowing system wide reduction of EMI of all clock dependent signals. The ASM3P2779A allows significant system cost savings by reducing the number of circuit board layers ferrite beads, shielding that are traditionally required to pass EMI regulations.

The ASM3P2779A uses the most efficient and optimized modulation profile approved by the FCC and is implemented by using a proprietary all digital method.

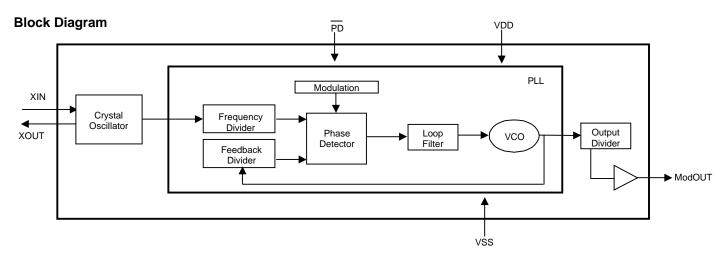

The ASM3P2779A modulates the output of a single PLL in order to "spread" the bandwidth of a synthesized clock, and more importantly, decreases the peak amplitudes of its harmonics. This results in significantly lower system EMI compared to the typical narrow band signal produced by oscillators and most frequency generators. Lowering EMI by increasing a signal's bandwidth is called 'spread spectrum clock generation'.

#### **Applications**

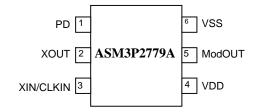

The ASM3P2779A is targeted towards all portable devices with very low power requirements like MP3 players and digital still cameras.

## **Key Specifications**

| Description               | Specification            |
|---------------------------|--------------------------|
| Supply voltages           | $V_{DD} = 3.3V \pm 10\%$ |
| Frequency Range           | 15MHz < CLKIN < 30MHz    |
| Cycle-to-Cycle Jitter     | 300 ps (maximum)         |
| Output Duty Cycle         | 40/60% (worst case)      |
| Output Rise and Fall Time | 1.1 ns (maximum)         |
| Modulation Rate Equation  | F <sub>IN</sub> /640     |
| Frequency Deviation       | ±1%                      |

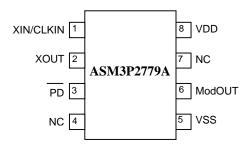

# Pin Configuration (6-pin TSOT-23)

| Pin# | Pin Name  | Туре | Description  |
|------|-----------|------|--|
| 1    | PD        | I    | Power-down control pin. Pull low to enable power-down mode. Connect to VDD if not used.  |
| 2    | XOUT      | 0    | Crystal connection. If using an external reference, this pin must be left unconnected.   |
| 3    | XIN/CLKIN | I    | Crystal connection or external reference frequency input. This pin has dual functions. It can be connected either to an external crystal or an external reference clock. |
| 4    | VDD       | Р    | Power supply for the entire chip (3.3V)  |
| 5    | ModOUT    | 0    | Spread spectrum clock output.  |
| 6    | VSS       | Р    | Ground connection.   |

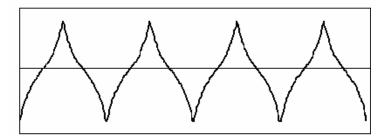

# Pin Configuration (8-pin SOIC and TSSOP)

# **Pin Description**

| Pin# | Pin Name  | Туре | Description  |
|------|-----------|------|--|
| 1    | XIN/CLKIN | I    | Crystal connection or external reference frequency input. This pin has dual functions. It can be connected either to an external crystal or an external reference clock. |
| 2    | XOUT      | 0    | Crystal connection. If using an external reference, this pin must be left unconnected.   |
| 3    | PD        | ı    | Power-down control pin. Pull low to enable power-down mode. Connect to VDD if not used.  |
| 4    | NC        | 1    | No connect.  |
| 5    | VSS       | Р    | Ground connection.   |
| 6    | ModOUT    | 0    | Spread spectrum clock output.  |
| 7    | NC        | -    | No connect.  |
| 8    | VDD       | Р    | Power supply for the entire chip (3.3V)  |

# **Modulation Profile**

# **Specification**

| Description         | Specification         |
|---------------------|-----------------------|
| Frequency Range     | 15MHz < CLKIN < 30MHz |
| Modulation Equation | F <sub>IN</sub> /640  |
| Frequency Deviation | ±1%                   |

| Symbol           | Parameter                                 | Rating      | Unit |
|------------------|---|-------------|------|
| $V_{DD}, V_{IN}$ | Voltage on any pin with respect to Ground | 0.5 to +7.0 | V    |
| T <sub>STG</sub> | Storage temperature                       | -65 to +125 | °C   |
| T <sub>A</sub>   | Operating temperature                     | 0 to 70     | °C   |

Note: These are stress ratings only and are not implied for functional use. Exposure to absolute maximum ratings for prolonged periods of time may affect device reliability.

### **DC Electrical Characteristics**

(Test condition: All parameters are measured at room temperature (25°C) unless otherwise stated)
